For more information on costing & your requirements, contact our Fabrication Headquarters, racing@iboettcher.com.au

T2 Shocks

Provides precise control on valving changes at all shaft speeds • Low speed sensitivity to valve changes substantially enhanced. Keeps the car planted! The adjusters on the AFCO T2 are based on the popular M2 shock & specifically designed to make fast, precise, & repeatable changes. The knobs are 100% o-ring sealed from the elements & easy to grasp, even with muddy, greasy, or gloved hands. The spring-loaded detents allow you to quickly change with a simple click.

Donny Schatz

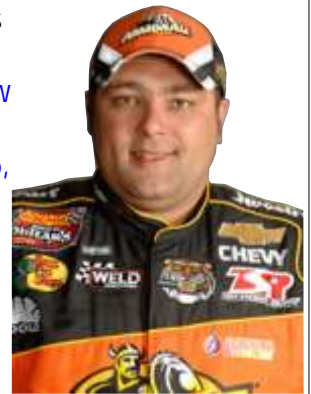

World of Outlaws Series Champion
